

**Add.**

1)  $2 + -6$

2)  $-10 + 9$

3)  $10 + -6$

4)  $-7 + 8$

5)  $10 + -5$

6)  $-9 + 5$

7)  $-5 + 4$

8)  $10 + -3$

9)  $-10 + 3$

10)  $-6 + 7$

11)  $10 + -1$

12)  $-6 + 1$

13)  $-4 + 7$

14)  $2 + -9$

15)  $10 + -7$

16)  $1 + -10$

Adding Integers

**Add.**

1)  $2 + -6$

Answer:  
-4

2)  $-10 + 9$

Answer:  
-1

3)  $10 + -6$

Answer: 4

4)  $-7 + 8$

Answer: 1

5)  $10 + -5$

Answer: 5

6)  $-9 + 5$

Answer:  
-4

7)  $-5 + 4$

Answer:  
-1

8)  $10 + -3$

Answer: 7

9)  $-10 + 3$

Answer:  
-7

10)  $-6 + 7$

Answer: 1

11)  $10 + -1$

Answer: 9

12)  $-6 + 1$

Answer:  
-5

13)  $-4 + 7$

Answer: 3

14)  $2 + -9$

Answer:  
-7

15)  $10 + -7$

Answer: 3

16)  $1 + -10$

Answer:  
-9

MathVine - Pre-Algebra

Name \_\_\_\_\_

Adding Integers

Date \_\_\_\_\_ Period \_\_\_\_\_

**Solution Steps**

1)  $2 + -6$

Plot 2 on a number line

Because the second number is negative, we move 6 to the Left

2)  $-10 + 9$

Plot -10 on a number line

Because the second number is positive, we move 9 to the Right

3)  $10 + -6$

Plot 10 on a number line

Because the second number is negative, we move 6 to the Left

4)  $-7 + 8$

Plot  $-7$  on a number line

Because the second number is positive, we move 8 to the Right

5)  $10 + -5$

Plot 10 on a number line

Because the second number is negative, we move 5 to the Left

6)  $-9 + 5$

Plot  $-9$  on a number line

Because the second number is positive, we move 5 to the Right

7)  $-5 + 4$

Plot  $-5$  on a number line

Because the second number is positive, we move 4 to the Right

8)  $10 + -3$

Plot 10 on a number line

Because the second number is negative, we move 3 to the Left

9)  $-10 + 3$

Plot  $-10$  on a number line

Because the second number is positive, we move 3 to the Right

10)  $-6 + 7$

Plot  $-6$  on a number line

Because the second number is positive, we move 7 to the Right

11)  $10 + -1$

Plot 10 on a number line

Because the second number is negative, we move 1 to the Left

12)  $-6 + 1$

Plot  $-6$  on a number line

Because the second number is positive, we move 1 to the Right

13)  $-4 + 7$

Plot  $-4$  on a number line

Because the second number is positive, we move 7 to the Right

14)  $2 + -9$

Plot 2 on a number line

Because the second number is negative, we move 9 to the Left

15)  $10 + -7$

Plot 10 on a number line

Because the second number is negative, we move 7 to the Left

16)  $1 + -10$

Plot 1 on a number line

Because the second number is negative, we move 10 to the Left
